Stock Market

money rate indicated that a lessening of loanable funds might be a positive influence in the dullness of the market. The fact that the rise in money rates was not confined to the call loan division carries the implication that the conditions are not merely temporary, or having to do with the October first payments. Time loans for the nearer maturities expansibly those which use or naving to do with the October first, payments. Time loans for the nearer maturities, especially those which just carry over the end of the present year, see notably affected. A somewhat easier tone for commercial paper is ascribed to a lessening of supply rather than to an iccrease in the domaind from buyers. The Subtreasury's requisitions in the banks are running very heavy, the withdrawals since the last bank statement having reached a total of over \$5,000,000. The government institution was a creditor at the clearing house again this moraling to the amount of nearly \$500,000, presigning another large withdrawal of cash from the banks to-merrow.

On the foreign exchange side, the course of foreign money markets holds rates against relief from the local money markets. The full 1 per cent. advance in the official discount rate of the bank of England to-day proves to have been amply forescen yesterday, and it was of no further indigence or

Quotations for interest-paying bonds are at a price, to which interest must be added. Income bonds and certificates of indebted-sess are flat.

COTTON MARKETS.

New York, September 28.—An early decline in the cotton market was followed by a sharp advance, but only the late months sold above the high level of yesterday, and the close was off from the best under realizing and selling for a reaction, although the final tone was very steady at a net decline of 1 point on November with other deliveries 36/11 points net higher. Business was very active during the morning, and after opening steady at a decline of 116/15 points or the months relatively easy in sympathy with Liverpool prices, advanced on covering by some of yesterday's late sellers and a renewal of aggressive support from prominent Wall Street and Western operators. The cables were lower than due on the New York close of yesterday, but showed no such weakness as would indicate that the English trade is taking a serious view of the Lancarbire situation, and this probably encouraged buying here, while September was COTTON MARKETS.

money markets. The full 1 per cent. advance in the official discount rate of the bank of England to-day proves to have been amply foreseen yesterday, and it was of no further influence on speculative sontiment. The signal must be heeded, nevertheless, and its warning effect was emphasized by the weekly statement of the Bank of France, showing inroads on the gold supply of that institution in common with the English bank, to supply the Egyptian demand on account of the large cotton movement. The private discount rate in Paris rose a fraction to-day.

A feature of the day's markets was the liquidation of corn in response to the excellent weather conditions for the completion of the process of maturing that crop. The increasing prospect of a bumper crop of that cereal had a helpful effect on stocks, especially those immediately concerned with the movement and use of corn. The special weakness of American sugar was taken to be due to an apprehension that the case of the government against that corporation may be made a prominent feature in the political campaign in New York State this fall.

The firm money market has not checked the improved demand for bonds. A feature is the reappearance on the tape of many investment issues which have been dormant for allong time past. The tone was strong. Total sales, par value, \$2,858,000. United States bonds were unchanged on call. Total sales for the day, 337,500 shares.

VIRGINIA TRUST CO.

CAPITAL ONE MILLION DOLLARS

Good as Gold

We have just made a loan of \$75,000 secured by a first mortgage on property worth over \$150,000. It is in the form of 6 per cent, coupon gold bonds of \$1,000 each, interest payable semi-annually at our office. The bonds mature at the rate of

In addition to the ample security stated above, each bond is guaranteed by eight successful gentlemen, whose annual income, in our opinion, largely exceeds this entire bond issue. We recomment this security to conservative investors. Full information given upon request.
